Create and Configure Jenkins Jobs with Job Sequencing

Logging into Jenkins before job creation:

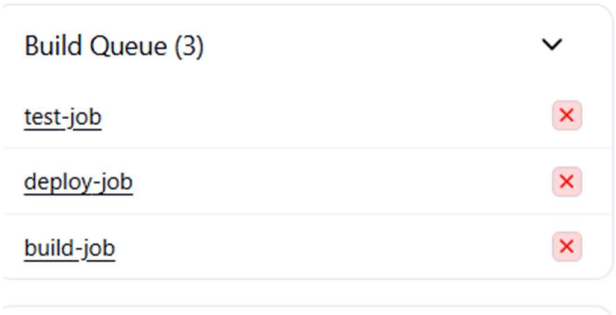

JOB Creation(build job, test job, deploy job)

Jobs created

JOBS ORDERING

Process:

To implement job ordering :

i)Go inside of a job which is already created

ii)click configure and go to post build actions

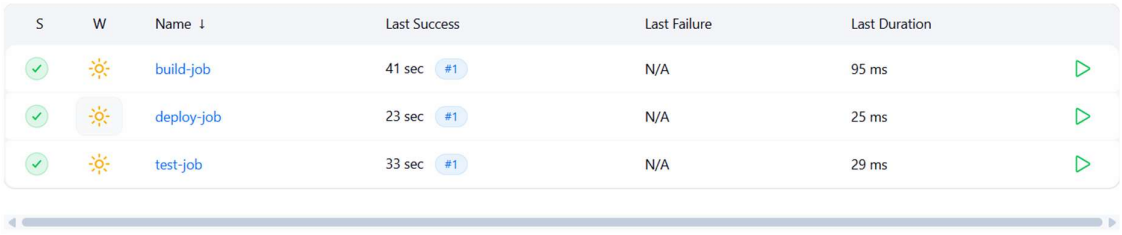

iii)click add post build actions

iv)click build other projects

v)Give the name of the project and click apply and save

Order of Implementation:

When the first job is triggered then automatically all the subsequent jobs will be triggered sequentially the process of implementing jobs without starting them is called as job ordering

Eventhough I have clicked the build job all the following jobs are executed..

build-job

Downstream Projects

test-job

Permalinks

- Last build (#3), 1 min 13 sec ago
- Last stable build (#3), 1 min 13 sec ago
- Last successful build (#3), 1 min 13 sec ago
- Last completed build (#3), 1 min 13 sec ago
